CATALOGUE OF APPROVED PHARMACEUTICALS FOR THE SAMHS: 2023

1. The list is based on a numerical pharmacological classification according to the MIMS. An index to the pharmacological classification is included (pages viii to xii).
2. A comprehensive alphabetical index of all approved preparations has been included which incorporates the generic names in small print and brand names in capital letters (pages 70-82). Names in bold are additions/changes since the previous edition of the SAMHS Medicine Formulary (SAMHS MF).
3. In respect of the individual pages of approved preparations:
 - a. The numerical index refers to the pharmacological classification according to the MIMS.
 - b. The first column is an alphabetical list of preparations based on the generic names.
 - c. The second column indicates common brand names, which have been included for reference purposes *and which may not be the trade name currently on tender*.
 - d. The third column indicates route of administration or dosage form and strengths on code.
 - e. *Items in italic are products that have been deleted from the MIMS or are not included in the MIMS. It doesn't necessarily infer that it has been discontinued, but stock availability may be a problem.*
4. Prescribed books for Primary Health Care Practitioners (PHCP's) is the South African Medicines Formulary (SAMF) and Primary Health Care Standard Treatment Guidelines and Essential Medicines List. All the items listed in these two books, that are also in the SAMHS MF are indicated as SA EDL: Prim (Primary health care level) and SA EDL: Sec (Hospital level) (indicated in green in the colour version). Tertiary medication on tender and not included in these lists are listed in the SAMHS MF in purple restricted to the applicable consultants as 2nd line only.
5. The primary items (indicated in red in the colour version) are divided into groups and are also indicated as such. (In brackets are the codes that are indicated in the index for ease of reference.):
 - a. SA EDL: Prim-1: May be prescribed by PHCP's **(P1)**.
 - b. SA EDL: Prim-2: May be prescribed by PHCP's, after treatment was initiated by a Medical Officer **(P2)**.

-
- c. SA EDL: Prim-3: May only be prescribed by a Medical Officer working at a Primary Health Care facility (**P3**).
 - d. SA EDL: Prim-4: SAMHS MF or PHC restricted item. May only prescribe when restrictions are adhered to (**P4**).
6. All the items that may be prescribed by the different categories of Emergency Care Practitioners, are indicated in the SAMHS MF as follows:
- a. Intermediate life support practitioners: **ILS** (2006).
 - b. Emergency care technicians: **ECT** (2009).
 - c. Advanced life support practitioners: **ALS** (2006).
 - d. Emergency care practitioners: **ECP** (2009).
7. It is the responsibility of all HCP's to make sure that they prescribe within their legal scope of practice.
8. This formulary will be updated by the SAMHS MF Committee twice a year. The SAMHS MF booklet will only be printed once a year, but as soon as it is updated after a Committee meeting, the updated version will be available on the intranet.
9. No patent medication may be supplied at state cost.
10. Prescriptions for medication will only be dispensed when the patient has actually consulted a registered HCP. Private prescriptions will only be accepted with the following proviso:
- a. The patient must accept that generic equivalents may be dispensed.
 - b. Items not listed in the SAMHS MF are for the patient's own account, except when motivated for on the SAMHS: Patient clinical motivation form for medicine not included in the SAMHS MF and approved. (See par 20 and copy of form on page vi-vii.)
11. The sending of a prescription by facsimile is only acceptable if it serves as a confirmation of a verbal instruction by a physician.
12. No telephonic prescriptions may be issued other than for emergency items and shall be followed up by a valid signed prescription within 24 hours.
13. Tranquillisers, analgesics and sedatives must be prescribed with discretion, only when absolutely necessary and then for a limited period, because of the misuse and abuse potential of abovementioned medication.
14. Patients on chronic medication may be issued with a repeat prescription, valid for 6 months. Repeat instructions on prescriptions must clearly indicate the items and intervals and must be restricted to chronic medication. All repeats not used after the repeat period shall be considered void.
15. Repeat prescription must be kept by the patient and presented to a military health facility every 28 days for dispensing, and unless approved by the OIC of the sickbay/the responsible pharmacist, a prescription may not be repeated within 25 days of the previous receipt. When the final repeat is issued, the prescription must be handed in for record keeping at the dispensing facility.
-

-
16. In the case of patients residing more than 50 km (or 1 hour drive) from a military health facility, repeat medicine may be issued in two batches of three month's supply at a time. Provision is subject to stock availability.
17. In remote places where no consultants are available, doctors must motivate if restricted items are needed. Included on page iv is an example of an authority form that consultants can complete to authorise MO's to prescribe restricted medication for a specified period (SG0006).
18. No more than 90 days' supply of Schedule 3, 4 or 5 substances may be supplied to any person crossing the borders of SA, except during external operational deployment or with approval from the prescriber in consultation with the pharmacy. No cross border deliveries are allowed.
19. ADR and Quality Reporting. An Adverse Drug Reaction and Product Quality Problem Report form must be completed when a motivation for replacement of a generic medicine is made. This form is to accompany the request for an alternative medicine. (See par 20.) A copy of the form must be sent to Dir Pharm for epidemiology. (See copy of form on page v.) (See Policy and procedures for the approval and provision of medicines for individual patient use not included in the SAMHS MF.)
20. Where a medicine not on the formulary is required for the treatment of a particular patient, the application must include a clinical motivation providing reasons as to why the medicine is needed for the patient in question. The application must also include evidence of efficacy and safety in similar groups of patients, for a similar indication with cost-effectiveness and affordability also being taken into consideration. (See copy of form on page vi-vii.) (See Policy and procedures for the approval and provision of medicines for individual patient use not included in the SAMHS MF.)
21. Only medication that is included in the SAMHS MF may be supplied to patients from a private pharmacy, unless appropriate motivation and approval has been obtained. (See Policy and procedures for buy-out prescriptions for dispensing by private pharmacies.)
- a. Buy-out prescriptions shall be endorsed with a stamp and the signature of an authorised pharmacist. No prescriber may authorise buy-out prescriptions. Unauthorised prescriptions handed in at private pharmacies will be for the member's own cost.
 - b. These prescriptions may only contain emergency medicine out of stock at a military health facility. The quantities prescribed on a buy-out prescription should be for 7 days' treatment preferably and not exceed 14 days' supply.
 - c. Private pharmacies shall be remunerated for the price of generic equivalents. In the case where patients insist on the original medication, the patient shall be responsible for the difference in price. (See Policy on generic substitution.)
22. The SAMHS MF has been compiled to control prescribing in order to promote cost effectiveness, ensure uniform standards, reduce polypharmacy and streamline procurement and stock control. This formulary restricts the spectrum of medication with the same therapeutic effect, but leaves the choice of the final product to the multi-professional team.

SOUTH AFRICAN MILITARY HEALTH SERVICE (SAMHS): PATIENT CLINICAL MOTIVATION FORM FOR MEDICINE NOT INCLUDED IN THE SAMHS MEDICINE FORMULARY

1. After completion of this clinical motivation form, please submit it to the SAMHS Medicine Formulary (SAMHS MF) Committee. Reference to supporting evidence, e.g. trials, studies, research papers and/or professional body guidelines must be attached. It is important that the motivation indicates why pharmaceuticals available are not acceptable.

2. Relevant test results, a **DD3638 or private prescription** and the SAHPRA Adverse Drug Reaction/Product Quality Problem Report Form, if applicable, must be attached. For non SAMHS prescribers, the referring SAMHS HCP must be indicated. As per the National Treasury Regulations, pharmaceutical trade names cannot be requested.

MALARIA PROPHYLAXIS –See also 18.4.

1. Doxycycline:

- a. Drug of choice for malaria prophylaxis in endemic malaria areas in Africa for all patients not allergic to tetracyclines. Certified safe for pilots, aircrew and divers.
- b. Contraindicated during pregnancy, lactation and in children younger than 8 years.

2. Atovaquone/Proguanil:

- a. Prescribe only when Doxycycline is medically contraindicated. **It is the most expensive malaria prophylaxis regimen.**
- b. Relatively safe drug for patients with CNS disorder.
- c. Safe for pilots and divers.

Atovaquone 250mg + (ATOVAQUONE/ Tabs (S2)
 Proguanil 100mg (PROGUANIL/eq)
(Pharmacist to review the Rx with prescriber)

- d. For children younger than 8 years, but with weight \geq 11kg:

Atovaquone 62.5mg + (ATOVAQUONE/ Paed Tabs (S2)
 Proguanil 25mg (PROGUANIL/eq)

3. Mosquito Repellent:

- a. For deployment in endemic malaria areas.
- b. For all other purposes the HCP must use his/her professional discretion.

Diethyltoluamide Sol 13% (TABARD/eq) Aer Spray
 Stick **(Not for deployments)**

TRANEXAMIC ACID (parenteral)/eq (Sec)	27	<i>Vitamin B12</i>	28, 69, 70
Trastuzumab	78	VITAMIN B12/eq (Sec)	69
TRASTUZUMAB/eq (Ter)	78	Vitamin B2	2, 69, 70
Travoprost	48	Vitamin B6	2, 69, 70
TRAVOPROST/eq	48	Vitamin C	69, 70
TRAVOPROST/TIMOLOL/eq (Ter)	48	<i>Vitamin D</i>	18, 42, 69, 70
Trazodone	5, 7	<i>Vitamin D3</i>	69
TRAZODONE/eq	5, 7	VITAMIN D3/eq (Sec)	69
TRESIBA/eq	63	<i>Vitamin E</i>	70
Tretinoin	39, 43, 45, 73	Vitamin K	26
TRETINOIN/eq (P1)	43, 45		

VITAMIN K/eq (P1)	26
Warfarin sodium	27
WARFARIN/eq (Sec)	27
Water	15
White soft paraffin	44, 45
XAILIN/eq	49
YASMIN PLUS/eq	51
YAZ PLUS/eq	51
Yeast	70
YELLOW FEVER VACCINE/eq	76
Yellow fever virus vacc (live attenuated)	76
Yellow soft paraffin	45
Zembrin	3
ZEMBRIN/eq	3
Zidovudine	62
ZIDOVUDINE (oral)/eq (P1)	62
ZIDOVUDINE (parenteral)/eq (Sec)	62
Zinc	70, 71
ZINC & CASTOR OIL OINTMENT BP/eq (P1)	44
Zinc oxide	44, 45
Zinc undecenoate	41
ZINC/eq (P4)	71
Ziprasidone	7
ZIPRASIDONE/eq	7
Zoledronic acid	18
ZOLEDRONIC ACID/eq	18
Zolpidem	2
ZOLPIDEM/eq	2
Zopiclone	2
ZOPICLONE/eq	2
Zuclopenthixol acetate	7
ZUCLOPENTHIXOL ACETATE/eq (Ter)	7
Zuclopenthixol decanoate	7
ZUCLOPENTHIXOL DECANOATE/eq (P4)	7
Zuclopenthixol dihydrochloride	7
ZUCLOPENTHIXOL DIHYDROCHLORIDE/eq	7
